All faculty and staff employees who are members of UC's two retirements plans (UCRS or PERS) and who are appointed to work at least 50 percent full-time, will be able to enroll in one of two dental plans — Aetna or Safeguard — during November's open enrollment period.

The Aetna plan emphasizes preventive health care and allows the individual to go to the dentist of his/her choice. The Safeguard plan is a prepaid plan and allows the individual to choose a dentist from a list provided by Safeguard.

It is important for all employees to know that this enrollment is a one-time opportunity. If you do not enroll in November, you will never have the chance again. At present, employer contributions will cover in full all premiums. This may change in the future. Coverage will be effective January 1, 1982.

A summary of the benefits each individual is currently signed up for has been mailed to all employees at their homes. In a separate mailing, information on the two dental plans will be mailed in the next two weeks. Departments have also received copies of the new dental plans. Employees are encouraged to review these plans carefully.

Several open enrollment discussion sessions have been arranged to help employees decide on which dental plan is best for them as well as to discuss all insurance changes that can be made during November: Tues., Nov. 3, HSW 303, noon-1 p.m.; Fri., Nov. 6, HSW 300, 10-11 a.m.; Tues., Nov. 10, SFGH 2A6, noon-1 p.m.; Thurs., Nov. 12, HSE 303, noon-1 p.m.; Wed., Nov. 18, HSW 300, 2-3 p.m.; and Mon., Nov. 23, HSW 300, noon-1 p.m.

For further information contact the Benefits Section, x1843 or see the special display in the Medical Sciences lobby.

The UC-Systemwide Administration will formulate a proposal early in November for consideration by the Regents as to how the University will respond programmatically to the most recent cuts in state funding announced by Governor Brown last month.

The Governor called for a two percent cut for many state agencies (including the University) for the rest of the fiscal year, 1981-82. This will be in addition to the budget cut for 1982-83 already announced which could amount to as much as $50 million.

UC Vice President William Fretter announced a hiring freeze last week. In addition, other options being considered by UC-Systemwide are deferral of many capital projects, reduction in enrollment, reduction in programs, and an increase in student fees.

The campus will not be able to analyze its own financial situation until after the Regents act on the specific proposal at their meeting the third week of November, Chancellor Sooy declared.

NEWS BRIEFS

The Chancellor's Award for University Service will be given to 10 employees at a ceremony and reception on Friday, November 6 from 3 to 5 p.m. in the Millberry Union lounges.

The staff awards are given to employees whose job performance has been exceptional, and who have had a beneficial impact on the campus over a long period of time. They were nominated by their department head and supervisor, then selected by a screening committee, and have to be at the top of their range for five years or more.

Each winner receives a certificate, the UCSF medallion, and a check for $1,000.

This year's honorees and the number of years they've worked at UCSF are: David R. Akers, Anatomy (30); Bobbie Edwards, Radiology (16); Alice Eknoian, Professional Fee Billing (23); Donya D. Harvin, Pediatrics (35); Vickie Miyasaki, Nursing (17); Alberta Rutledge, Nursing (15); John Smail, Radiology (15); Antonia J. Smirnow, CVRI (15); Judy Thoma, Accounting (14); and Chester W. Truman, Research and Development Laboratory (15).

A new multi-disciplinary clinic has been set up to study and treat Kaposi's Sarcoma, a rare but unusually aggressive form of cancer that has been seen this year in gay men across the country.

The clinic, under the direction of dermatologist Marcus A. Conant and oncologist Paul Volberding, now is in the process of gathering information by interviewing victims and comparing their histories with those of other gay or straight men.

The disease, until this year, was considered a rare illness of the elderly in this country, or of residents of a swath of equatorial Africa. More than 60 cases of Kaposi's Sarcoma have been identified in various cities, mostly in New York, San Francisco, Los Angeles and Atlanta. More than 20 cases have been identified in San Francisco.

The clinic is on the third floor of the Ambulatory Care Center and meets on Thursdays, 11 a.m. to noon. For further information on Kaposi's Sarcoma, contact Marcus Conant at x3261.

Almost 2,000 members of the UCSF campus community, friends and neighbors attended the First Annual Campus Family Picnic on October 17 in Golden Gate Park.

One of the main events, the "Chancellor's Cup Race," a five-kilometer (three-mile) event, coordinated by cardiologist John Hutchinson, attracted almost 300 novice and seasoned runners with first-place overall winners Steve Scharmann (15:32) and Quita Lopez (18:58), both second year medical students. Other winners were: Eleanor Haas and Fred Dunn, over age 50; Jeanie Jones and Richard Keene, 40-49; Gail Rodd and Mike Conroy, 30-39; Quita Lopez and Steve Scharmann, 16-29; Marua Digiesi and Glen Ceremony, 12-15; and Andrea Smith and Michael Lucaccini, under 12. The overall winners received medals and will have their names engraved on the Chancellor's Cup to be displayed in the Medical Sciences lobby; first, second and third place winners received medals; and all competitors who completed the race received free UCSF T-shirts.

Entertainment was provided by the hoedown group, "The Arkansas Sheiks," and the "UCSF Marching Band." Adults and children alike enjoyed games, hot dogs, beer and soft drinks.

The Sex and Disability Unit of the Human Sexuality Program has received funding to provide training in family life education and social skills development for teachers and parents of disabled students. Priority will be given to those individuals working with either visually or hearing impaired students.

Two separate activities of the project are: Training in Sexuality and Family Life Education, April 3 to 7, 1982 and Social Skills Development Training, February 6 and 7, 1982. For further information contact Carla Thornton, 814 Mission St., 2nd fl., S.F. 94103, x1066.

Outdoors Unlimited, located at 24 Kirkham Street, is holding a used equipment sale the week of November 2. On sale will be cross-country skis, ski boots, Grumman canoes, backpack tents and backpacks. Individuals are invited to bring their own equipment to swap or sell. The Outdoors Unlimited Center is open Monday to Friday, 11:30 a.m. to 1:30 p.m. and 4 to 6 p.m. For further information call x2078.

The Campus Police and the Rape Prevention Education Program, citing three recent assault attempts on women, are alerting the campus community and visitors to be aware of suspicious persons or circumstances.

According to Lieutenant John Anderson, on September 28 there were two unrelated attempted assaults in the campus garages. Both women were able to fend off their assailants and no serious injury occurred. On September 9, a female employee was confronted on the sixth floor of the Medical Sciences building by a man who exposed himself and grabbed her. Her screams brought aid from several employees and the man was arrested.

In each case the woman reacted swiftly and successfully to deter the assault.

The campus community is reminded of several systems and services on campus aimed to increase personal safety:

- The new alarm system has 45 locations in the Millberry Union and Ambulatory Care garages, and is marked with large red and white signs. It can be operated simply by pushing the button and stating the nature of the emergency. A police officer will be immediately sent to the location.
- The Night Security Shuttle operates between 5:30 p.m. and 2 a.m., seven nights a week and picks up people every 15 minutes on all levels of the Millberry Union garage, in front of the Medical Sciences building, Langley Porter and the School of Dentistry, and transports workers, students and visitors to their homes or cars in nearby locations.
- The Rape Prevention Education Program sponsors self defense and tear gas classes, and discussion groups on personal safety. The program also offers counseling, referrals, and assistance to victims. For further information call x5683.
- The UCSF Police Department operates 24 hours a day. The police emergency number is x1110; non-emergency is x1414.

Applications for UC's 1982-83 cancer funds are due in the President's Systemwide Office by January 8, 1982.

These funds provide small grants for new faculty to initiate cancer research projects, for established investigators in areas of research other than cancer to initiate cancer research projects, and for established cancer investigators to pursue new leads which cannot properly be supported from existing resources.

Those eligible to apply for these funds include: members of the Academic Senate, including emeriti, appointees at 50 percent or more of full-time in the clinical and adjunct professor series, permanent appointees at 50 percent or more of full-time in the professional research series, and equivalent titles in the agricultural experiment stations.

Information and application forms can be obtained from the UCSF Contracts and Grants Office at 1483-4th Avenue, x2977, or by calling UC-Berkeley's Cancer Research Coordinating Committee on the ATSS 8-582-2923.

UCSF investigators received the top research award of the American Society of Plastic and Reconstructive Surgery for "outstanding work" on how reconstructive tissue flaps are affected by the presence of infection.

The research, which is the first reported scientific analysis on this subject, provides important data for solving one of the most common problems in reconstructive surgery — covering the large, infected wound. The study found that muscle tissue flaps provide important protection against potential infection.

Principal study investigator was Stephen J. Mathes, associate professor, Plastic and Reconstructive Surgery. Co-investigator was Ning Chang, general surgery resident. The study was done in collaboration with Thomas K. Hunt, professor, Surgery and a national leader in wound healing research.

The award, which recognizes the best research paper of the year, was presented during the Society's annual meeting in S.F. in October.

A series of free health sciences lectures for the general public will begin in November as a pilot program, co-sponsored by the Office of Public Service Programs and the Committee on Arts and Lectures.

The first lecture will be given by Patricia T. Kelly, associate research geneticist, Epidemiology and International Health. Her topic will be "The Odds of Getting Breast Cancer: An Update and Re-appraisal." It will be held on Wednesday, November 11, from 7:30 to 9 p.m. in the LPPI Auditorium.

The second lecture in the series is "Sexual Myths in the 80's: A Critical Update," by a panel comprising Evalyn S. Gendel, director, Human Sexuality Program (HSP); Susan Knight, director, Sex and Disability Unit, HSP; David Bullard, director, Sex and Disability Training Project; and Emmett J. Bonner, a S.F. medical sociologist and consultant. It will be held on Wednesday, November 18, 7:30 to 9 p.m., also in the LPPI Auditorium.

Talks on recent DNA research will be given in January and February. For further information contact Vida Labrie, senior planner for the series, in the Office of Public Service Programs at x3206.

The Second Annual Riebe Lecture will be held on Saturday, November 14 at the Miyako Hotel, S.F.

Entitled "The Fourth Dimension in Dentistry," the lecture will feature three dental alumni: Robert Brigante, '46, clinical professor, Restorative Dentistry, "The Fourth Dimension in Dentistry"; Alton Lacy, '75, assistant professor, Restorative Dentistry and Biomaterials, "Probably More Than You Want to Know About Porcelain Fused to Metal"; and Robert Birtcil, Jr., '67, assistant clinical professor, Restorative Dentistry, "Recent Advances in Restorative Dentistry."

The lecture honors Admiral H. Paul "Spitz" Riebe, '25, who was the first UCSF dental graduate to achieve the rank of Admiral. He died in March, 1980.

The lecture is presented by the Alumni Association of the School of Dentistry. Advance registration is required. For further information contact Continuing Education in Dentistry, x1101.

The most recent developments in the area of targeted chemotherapy and the role of liposomes as carriers will be discussed at the symposium entitled "Frontiers in Liposome Research — Targeted Chemotherapy," Thursday to Saturday, November 5 to 7 at the Hyatt Union Square Hotel, S.F.

Several UCSF faculty including Dean Jere Goyan, School of Pharmacy, and Tim Heath, assistant research biochemist, Cancer Research Institute, will explore the problems and prospects for moving liposomes from the laboratory into the clinic. Co-chair is Demetrios Papahadjopoulos, professor, Pharmacology, Cancer Research Institute.

The symposium is sponsored by the schools of Pharmacy and Medicine and the Northern California Cancer Program. For registration information contact Frank Szoka, assistant professor, Pharmacy and Pharmaceutical Chemistry, at x3895.

The American Society for Cell Biology will hold its largest meeting ever, November 9 to 13 in Anaheim. The meeting, chaired by Daniel Friend, professor and vice chair of Pathology, will include presentation of 1,514 abstract-based papers.

Presentations from UCSF include: Daniel Friend, a symposium on "Plasma Membrane Diversity"; Zena Werb, associate professor, Laboratory of Radiobiology and Radiology, a symposium on "Mechanisms of Endocytosis"; and Demetrios P. Papahadjopoulos, professor, Pharmacology, Cancer Research Institute, will moderate a mini-symposium on "Liposomes as a Tool in Cell Biology."
